

CHANDAN PAL

Mohali, Punjab

chandanpal11212@gmail.com — +91 9883217980 — [GitHub](#)

Profile

Computer science undergraduate with a strong foundation in machine learning, data structures, and problem-solving. Passionate about applying AI to real-world problems, building intelligent systems, and continuously learning emerging technologies.

Education

Chandigarh University, Mohali	Aug 2023 – Jun 2027
Bachelor of Engineering in Computer Science	CGPA: 7.53
Suri Benimadhab Institutions, West Bengal	Feb 2021 – Mar 2022
Class 12th (Non-Medical)	Score: 81.5 %
Gourbazar Rampada High School, West Bengal	Jan 2019 – Mar 2020
Class 10th	Score: 69.4%

Technical Skills

Programming Languages: Python, C++, Java

Tools & Technology: GitHub, Git, TensorFlow, PyTorch, Streamlit, LangChain

Cloud: Microsoft Azure, AWS

Databases: MySQL, MongoDB

Design Tools: Figma

Skills: Data Structure and Algorithms, Artificial Intelligence, Machine Learning, Deep Learning

Projects

Movie Recomending System May 2025

Developed an AI-powered movie recommendation system that delivers personalized suggestions based on user preferences and historical interactions.

- Trained a deep learning recommendation model using user-item interaction data to predict movie preferences

Tech Stack: Python, TensorFlow/PyTorch, Pandas, NumPy, Deep Learning

AI-Powered Dynamic Difficulty Adjustment Game | Deep Learning & Azure Jan 2026

Built an AI-powered game that personalizes gameplay in real time by predicting player skill levels and dynamically adjusting difficulty through a cloud-deployed deep learning model.

- Developed and trained a deep learning model using gameplay analytics to predict optimal difficulty levels
- Integrated real-time AI inference to adapt enemy behavior and game complexity during gameplay
- Deployed the model on Azure and connected it to the game via REST APIs for scalable, low-latency predictions

Tech Stack: Python, PyGame, PyTorch, Azure, REST APIs, MLflow

Custom Large Language Model (LLM) | Deep Learning & NLP May 2026

Developed a GPT-style Large Language Model from scratch, implementing the complete training pipeline from tokenization to text generation.

- Built and trained a Transformer-based language model using PyTorch, including self-attention, positional embeddings, and autoregressive text generation
- Developed text generation capabilities using temperature sampling and context-window based prediction

Tech Stack: Python, PyTorch, Transformers, NLP, Deep Learning, Tokenization

Certificates

5-Day AI Agent Intensive Course (Kaggle)

5- Day Intensive Generative AI Course (Kaggle)

Languages Known : - Bengali, English, Hindi
